Election/Restrictions

Improper Markush

1. Prior to setting forth the restriction requirement, it is pointed out that applicants have presented instant claims in improper Markush format, see *Ex parte Markush*, 1925 C.D. 126, *In re Weber*, 198 USPQ 334 and MPEP 803.02 and 806.04.

"Since the decisions in *In re Weber* **, 198 USPQ 328 (CCPA 1978); and *In re Haas*, 198 USPQ 334 (CCPA 1978), it is improper for the Office to refuse to examine that which applicants regard as their invention, unless the subject matter in a claim lacks unity of invention, *In re Harnish*, 631 F.2d 716, 206 USPQ 300 (CCPA 1980); *Ex Parte Hozumi*, 3 USPQ2d 1059 (Bd. Pat. App. & Int. 1984). Broadly, unity of invention exists where compounds included within a Markush group (1) share a common utility and (2) share a substantial structural feature disclosed as being essential to that utility."

The claims are improperly set forth as the genus claims encompassing multiple distinct and peptides, as identified and claimed, which fail to share the characteristics of a genus, i.e., a common utility and a substantial structural feature essential to the disclosed utility. Alternatively, the claims define multiple structurally distinct compounds capable of different use, with different modes of operation, different function and different effects. A reference against one of the claimed components or methods would not be a reference against the other. Therefore, the restriction will be set forth for each of the various groups, irrespective of the improper format of the claims, because the claims define inventions which are not proper species.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1647

Group I, claim(s) 1-8, 12 and 14 in part, drawn to the first special technical feature peptide (SEQ ID NO:2), first method of making and first appearing use of the peptide in an immunoassay method.

Group II, claim(s) 1-8, 12 and 14 in part, drawn to the second special technical feature peptide (SEQ ID NO:4) and first appearing use of the peptide in an immunoassay.

Group III, claim(s) 1-8, 12 and 14 in part, drawn to the third special technical feature peptide (SEQ ID NO:6) and first appearing use of the peptide in an immunoassay.

Group IV, claim(s) 9-11, 13 in part drawn to the fourth special technical feature antibody (binding SEQ ID NO:2).

Group V, claim(s) 9-11, 13 in part drawn to the fifth special technical feature antibody (binding SEQ ID NO:4).

Group VI, claim(s) 9-11, 13 in part drawn to the sixth special technical feature antibody (binding SEQ ID NO:6).

Group VII, claim(s) 15-17, drawn to the seventh special technical feature transgenic nonhuman vertebrate.

3. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the peptides, nucleic acids and antibodies differ in sequence structure, length, function, effects and capable use. The methods use different steps and different reagents corresponding to the distinct special technical features, and exhibit different effects, functions and outcomes.

Art Unit: 1647

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. Any inquiry of a general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Papers relating to this application may be submitted to Technology Center 1600, Group 1640 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Should applicant wish to FAX a response, the current FAX number for Group 1600 is (703) 308-4242.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharon L. Turner, Ph.D. whose telephone number is (703) 308-0056.
